PROFESSIONAL SUMMARY

Computer Engineering student and Software Development Intern with hands-on experience in backend development, data analysis, user research and technical community leadership. Experienced in developing and maintaining enterprise applications, analyzing performance metrics, coordinating technical content and translating user and community insights into actionable improvements.

TECHNICAL SKILLS

Languages: Java • JavaScript • C • Python • SQL

Backend & Frameworks: Spring Boot • Node.js • Express • JSP • APIs REST

Frontend: HTML5 • CSS3 • React • Tailwind CSS

Databases: SQLite • MySQL • PostgreSQL • MongoDB

DevOps & Tools: Git • GitHub • Docker • Linux • Maven • Apache Tomcat • Postman • Bitbucket • DBeaver

Software Engineering: Scrum • Kanban • MVC

EDUCATION

Bachelor's Degree in Computer Engineering – Federal University of Goiás (UFG)

Expected: March 2029

Technical Degree in Web and Mobile Development – Escola do Futuro Luiz Rassi (EFG)

Completed: July 2025

PROFESSIONAL EXPERIENCE

Software Development Intern - ILION Soluções Web | August 2025 – Present

- Maintained and enhanced 5–7 enterprise applications across corporate, educational, union and public examination domains, delivering improvements used by companies and hundreds of end users.
- Developed 20+ features and resolved 20+ software defects, contributing throughout the Software Development Life Cycle (SDLC), from requirements analysis to production deployment.
- Resolved 40+ support tickets, independently handling approximately 87% of assigned requests while collaborating on complex architectural decisions.
- Designed SQL queries and maintained MySQL and PostgreSQL databases, implementing schema changes to support new business requirements.
- Developed backend and web application features, including accessibility improvements, dynamic forms, email integrations, document generation and usability enhancements.
- Maintained and refactored legacy Java 6 applications, adapting existing modules while ensuring system stability and backward compatibility.
- Deployed applications on Linux using Apache Tomcat, validating production releases and supporting application availability.
- Reduced assembly setup time from 6 hours to 2–4 hours by optimizing workflows and improving implementation processes.

Web Development Instructor - Jan 2024 – May 2024

Technologies: HTML • CSS • Java • Python • Web Development • Programming Logic

- Delivered Web Development and Programming courses for 4 technical classes, supporting approximately 120 students and impacting around 180 learners.
- Developed instructional materials, coding exercises, assessments and hands-on projects covering Web Development and Programming fundamentals.
- Designed a challenge-based teaching methodology to increase student engagement through practical activities and programming competitions.

- Mentored 10–15 capstone projects, evaluating code quality, software organization and technical presentations.
- Planned course schedules, learning activities and student progress throughout the program.
- Contributed to students' professional development, with several graduates pursuing careers in Software Development.

Technical Content Coordinator (Volunteer) - Juninhos Community | Apr 2026 – Present

- Coordinated a team of **4 volunteers**, organizing editorial planning, task distribution and publication workflows.
- Curated, reviewed and published technical content focused on **Software Development, Java, Python, SQL, Git and REST APIs**.
- Managed content planning using **ClickUp**, coordinating activities between content and design teams.
- Analyzed performance metrics and refined content strategies to improve audience engagement and reach.

Key Results

- 11K+ LinkedIn impressions
- 400+ new followers
- 52K+ Instagram views
- ~13% engagement rate

Google Gemini Student Ambassador (Volunteer) - Google | Aug 2026 – Present

- Represent the Google Gemini ecosystem within the university community, engaging students around generative AI and emerging AI technologies.
- Support community initiatives and knowledge-sharing activities focused on practical applications of AI in academic and student contexts.
- Engage with students and technology communities to encourage experimentation, learning and responsible adoption of AI tools.

Campus Strategy Analyst - Meitu 美图 | Set 2026 – Present

- Conduct user research activities focused on AI and imaging applications, observing local usage patterns and emerging trends among young users.
- Collect and structure user feedback through surveys, interviews and qualitative research to identify behavioral patterns and product pain points.
- Analyze user behavior and feedback to support the development of user profiles, journey maps and actionable product insights.
- Transform research findings into structured reports and presentations, contributing local perspectives to global product and business strategy.

LEADERSHIP

Vice Coordinator – Robotics Projects - Rassilianos Robotics | Jan 2023 – Jun 2026

- Promoted from Robotics Team Member to Vice Coordinator, leading technical teams of 10–30 members during robotics projects and competitions.
- Contributed to the development of 15+ robots for automation projects and national and international robotics competitions.
- Developed embedded solutions using Arduino/C++, integrating sensors, electronics and 3D-printed components.
- Coordinated technical activities, mentored new members and organized competition logistics.
- Competed in 6+ robotics events, including the Brazilian Robotics Olympiad (OBR) and the FIRA RoboWorld Cup, earning state-level awards and representing the team internationally.

FEATURED PROJECTS

Fleurye – Full Stack E-commerce Platform

Technologies: JavaScript • Node.js • Express • SQLite • HTML5 • CSS3 • EmailJS • Render • Git

Live Demo: <https://fleurye-project.onrender.com>

- Independently developed a **Full Stack e-commerce platform** to strengthen practical skills in JavaScript, Node.js, Express and SQLite without relying on front-end frameworks.
- Built **10+ REST APIs**, approximately **10 application routes** and **7 user interfaces**, including a product catalog, shopping cart, administrative dashboard and complete CRUD operations.
- Designed and implemented the relational database, defining data models, relationships and business rules.
- Integrated image upload and **EmailJS** to support customer communication.
- Deployed the application using **Render** integrated with **GitHub**.
- Solved technical challenges involving **CORS**, database persistence during deployment and data consistency between products, categories and images.

Sports Court Reservation System (Academic Project)

Technologies: Java • JavaFX • SQLite • MVC • Object-Oriented Programming

- Collaborated on the development of a desktop application for managing sports court reservations.
- Developed the Controller layer, implementing user authentication, registration and scheduling conflict validation.
- Applied Object-Oriented Programming (OOP) and the MVC architecture to structure the application.
- Integrated the user interface with an SQLite relational database for data persistence.
- Strengthened practical experience in desktop application development, business logic implementation and database integration.

RPG with Dynamic Data Structures (Academic Project)

Technologies: C • Dynamic Memory Allocation • Linked Lists • MergeSort • QuickSort

- Developed a terminal-based RPG using dynamic data structures and low-level memory management in C.
- Implemented gameplay mechanics, character progression and event systems based on randomized dice rolls.
- Developed and integrated doubly linked lists to manage game entities dynamically.
- Applied MergeSort and QuickSort algorithms to optimize in-game data organization.

- Strengthened knowledge of pointers, structs, dynamic memory allocation and algorithm implementation.

LANGUAGES

Portuguese: Native

English: A2 (Technical Documentation)

Mandarin Chinese: Beginner (Currently Studying)

Spanish: Basic
